NHTSA ID Number 00V288

Date Issued 10/01/00

Quantity Affected 76,652

Dates Of Manufacture November 1999 - April 2000

Noncompliance Certain light duty trucks and sport utility vehicles equipped with automatic transmissions fail to comply with the requirements of Federal Motor Vehicle Safety Standard No. 102, "Transmission Shift Lever Sequence, Starter Interlock, and Transmission Braking Effect." These vehicles could have a shift cable lock plate that is too brittle and can break. The gear shift lever and the "PRNDL" indicator may move, but the transmission will not shift out of the "Park" position. Also, the gear indicated on the display may differ from the gear engaged in the transmission. If the driver selects "Drive" and the transmission is actually in "Reverse", a vehicle crash could occur.

Remedy Dealers will replace the automatic transmission shift cable lock plate. The manufacturer has reported that owner notification began Nov. 6, 2000. Owners who do not receive the free remedy within a reasonable time should contact Nissan at 1-800-647-7261.

NHTSA ID Number 03V307

Date Issued 08/01/03

Quantity Affected 31,700

Dates Of Manufacture October 1999 - February 2000

Defect On certain sport utility vehicles, the alloy wheels used on these vehicles may not have been properly manufactured and could develop cracks in the wheel spokes. If a sufficient number of spoke cracks develop, the wheel could fail and separate from the mounting hub, possibly resulting in a vehicle crash without prior warning.

Remedy Dealers will replace the four alloy wheels with Xterra SE model bright alloy wheels. The spare tire steel wheel is not affected. The manufacturer has reported that owner notification began on September 15, 2003. Owners may contact Nissan at 1-800-647-7261.

Dates Of Manufacture	June 1998 - March 2003
Defect	On certain pickup trucks equipped with six cylinder engines, and sport utility vehicles equipped with four or six cylinder engines, the fuel pump terminal on the fuel-sending unit can develop a crack in the plastic molding. This can cause the terminal strip to corrode under some environmental conditions. If corrosion occurs, the terminal strip could eventually break causing the fuel pump to stop operation. This will result in not being able to start the engine or cause the engine to stop running without warning, which can result in a crash.
Remedy	In the following states, dealers will replace the fuel-sending unit. These states are Connecticut, Delaware, Illinois, Indiana, Iowa, Kentucky, Maine, Maryland, Massachusetts, Michigan, Minnesota, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Tennessee, Vermont, Virginia, West Virginia, Wisconsin, and the District of Columbia. In the other
States, The Dealer Will Inspect The Fuel Pump Terminal On The Sending Unit For	states, the dealer will inspect the fuel pump terminal on the sending unit for corrosion. If corrosion is present, the dealer will replace the unit. If there is no corrosion, the dealer will apply sealant to the terminal housing to help prevent corrosion in the future. The manufacturer has reported that owner notification began on June 28, 2004. Owners may contact Nissan at 1-800-647-7261.
